

AquaGreen Utility Inc.

TO: The Tennessee Public Utility Commission

March 23, 2020

Aqua Green Utility is committed to implementing various emergency measures to prevent and contain the spread of the Coronavirus (COVID-19). We recognize that continued access to our critical utility services is a matter of national security and vital to the public health, safety and welfare.

In order to help deal with this crisis, we have greatly increased our inventory of replacement parts because of our concern about possible supply chain interruptions.

We also have the necessary gloves, masks and disinfectants to ensure that our employees are protected and will be capable of performing their duties.

In case we need to go make a repair to our system at a customer's house, we will ask them for assistance in maintaining social distancing from our employees while they work on the system.

By maintaining the above, we are able to provide our customers with the continued uninterrupted service they are used to.

Thank you for your time and consideration.
